• Please join an English summary describing the research, its significance and key findings (1.000 words)
• RELEX will contact the winner personally in early January with an invitation to Helsinki to present the work at RELEX seminar (Jan. 22nd)
About RELEX

RELEX is Europe’s fastest growing provider of supply chain systems, to retailers, distributors and manufacturers.

RELEX clients in 12 European countries have become more efficient and more profitable through our pioneering demand forecasting, inventory optimisation and actionable analytics. Our systems help our partners integrate their supply chains, and factor in essentials such as fluctuations in demand, store campaign and display needs and replenishment patterns.

Clients typically cut spoilage by 40%, inventory by 30% and boost on-shelf availability to 98%+, saving tens of millions of pounds and improving their sales, profits and customer satisfaction.

RELEX’s proprietary database compresses information 10 times more efficiently than traditional options allowing instant results to be drawn from big data flows. Our groundbreaking technology makes implementations quick, gives our clients almost complete independence and produces rapid results.

Founded in 2005 by a group of leading logistics scientists from Helsinki University of Technology, RELEX is fast becoming established as the first choice of retailers and manufacturers across Northern Europe. The company employs over 65 people at its offices in London, Stockholm, Wiesbaden and its Helsinki headquarters. For more information: relexsolutions.com
